

Fix: Please Log In Using R Trader or R Trader Pro

Connections & Data Feeds / Troubleshooting | beginner | 15 min to complete | DeepCharts Help Center | July 20, 2026

This error comes from Rithmic when you try to connect a Rithmic data feed or trading account whose required Market Data Agreement has not been signed yet. Rithmic requires you to log in through R Trader or R Trader Pro (or its website) at least once and accept the agreements before any third-party platform — including DeepCharts — is allowed to connect. Your credentials can be perfectly correct and the connection will still be rejected until this is done.

Symptom

When connecting a Rithmic feed, the connection fails with:

Connection Failed: Please log in using R | Trader or R | Trader Pro and sign the agreements

[SCREENSHOT PLACEHOLDER] The connection error dialog showing the "Please log in using R | Trader or R | Trader Pro and sign the agreements" message `rithmic-sign-agreements-error.png`

Not to be confused with:

- Fix: Connection Failed — Check Username and Password — Rithmic rejects the credentials themselves; here the credentials are accepted but the agreement is missing.
- Fix: Rithmic — Expert Not Attached — a different Rithmic error with its own cause.

Most likely cause

The Rithmic Market Data Agreement for this account has never been signed — typically because you have never logged into R Trader or R Trader Pro with it.

Quick fix

Sign the agreement through the Rithmic website — no installation needed:

1. Open the Rithmic website's trader login page. **[CONFIRM: exact URL of the Rithmic web page where the Market Data Agreement is signed]**
2. Log in with your Rithmic credentials (prop-firm traders: the Rithmic username and password from your firm's welcome email — not your firm's website login).
3. Review and sign the Market Data Agreement, selecting **Non-Professional** status if it applies to you.
4. Save and confirm the agreement.
5. Restart DeepCharts and reconnect the feed.

If that didn't work

Cause: The agreement needs to be signed in R Trader Pro

If the website route is unavailable for your account, sign through the R Trader Pro application:

1. Download R Trader Pro from <https://www.rithmic.com/rtraderpro> — click the **Download R | Trader Pro** button.
2. Run the installer and complete the installation with the default options.
3. Launch R Trader Pro. The login screen shows two login forms side by side — fill **both** forms with the same credentials and the same selections; this is how it is designed to work.
4. In each form, set **System** to your firm or system (Apex users select **Apex**), set **Gateway** to the location nearest to you (Chicago, Europe, Singapore...), and enter your Rithmic username and password.

[SCREENSHOT PLACEHOLDER] The R Trader Pro login screen showing the two side-by-side login forms, both filled with System, Gateway, Username and Password `rtrader-pro-dual-login.png`

5. Click **Login**.

6. When prompted, read and accept the Market Data Agreement, selecting **Non-Professional** status if it applies to you.

[SCREENSHOT PLACEHOLDER] The Market Data Agreement prompt inside R Trader Pro with the accept action visible `rtrader-pro-agreement-prompt.png`

7. Close R Trader Pro — the agreement is now recorded on Rithmic's side.

8. Open DeepCharts and reconnect the feed.

Tip: If you closed R Trader Pro before the agreement prompt appeared, log back in — the prompt reappears until the agreement is accepted.

Note: Do not confuse the **System** field with the **Server** field — both can show similar values (such as Apex), but they are different fields.

Cause: You cannot log into R Trader Pro at all

If R Trader Pro also rejects your login, the credentials are the problem, not the agreement — most often a prop-firm website login was used instead of the separate Rithmic credentials. See [Fix: Connection Failed — Check Username and Password](#).

Still stuck

Generate a Diagnostic Report: Before You Contact Support, then contact the team through [How to Get Help](#) (Chat, Diagnostic Report, Support) — mention whether you were able to log into R Trader Pro and whether the agreement prompt ever appeared.

Prevent this

The agreement only needs to be signed once per account — do it before the first connection attempt. See [Sign Your Market Data Agreement](#) for the general process, [Connect Rithmic Using the RTrader Pro Plugin](#) for working with R Trader Pro, and [How to Connect a Rithmic Data Feed](#) for the full connection setup.
