

How to Manage Symbol Rollover

How To | beginner | 2 min read | DeepDOM Help Center | August 24, 2026

This article explains what futures contract rollover is and how to manage symbol rollover in DeepDom so that your charts and tools always reference the correct expiration.

What Is Rollover?

In futures markets, rollover is the process of transferring an open position from an expiring contract to a contract with a later expiration date. Traders roll positions forward to avoid the automatic liquidation or delivery that occurs at expiration.

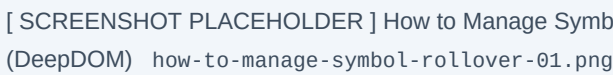

Technical Rollover

The technical rollover occurs at or very near the official expiration date defined by the exchange. It is tied to the last trading day of the contract.

Volume Rollover

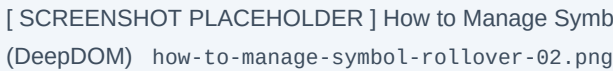

The volume rollover happens earlier, when trading volume on the next contract exceeds volume on the expiring contract. Many traders switch at this point to benefit from better liquidity and tighter spreads.

Procedure to Perform Rollover in DeepDom

[SCREENSHOT PLACEHOLDER] How to Manage Symbol Rollover — Procedure to Perform Rollover in DeepDom (DeepDOM)  how-to-manage-symbol-rollover-01.png

Go to Options > Symbol Rollover .

Perform the rollover only for markets highlighted in the Symbol Rollover

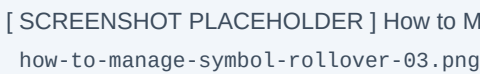

[SCREENSHOT PLACEHOLDER] How to Manage Symbol Rollover — Procedure to Perform Rollover in DeepDom (DeepDOM)  how-to-manage-symbol-rollover-02.png

Execute rollover for all related markets, including minor contracts such as MINI and MICRO .

If a MICRO contract is not automatically listed, open a Heatmap or other DeepDom window for that instrument and recheck the Symbol Rollover window.

After these steps, the contract expiration used by DeepDom for the selected symbols is updated correctly.

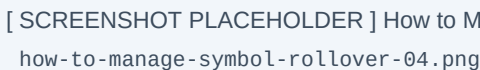

Restoring a Previous Expiration

[SCREENSHOT PLACEHOLDER] How to Manage Symbol Rollover — Restoring a Previous Expiration (DeepDOM)  how-to-manage-symbol-rollover-03.png

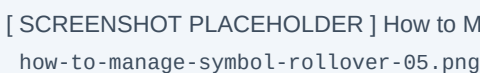

Disconnect your Feed and Close the Workspace

Go to Options > Symbol Management .

Click the Expert Mode

[SCREENSHOT PLACEHOLDER] How to Manage Symbol Rollover — Restoring a Previous Expiration (DeepDOM)  how-to-manage-symbol-rollover-04.png

In the Symbol List (middle column), locate the markets with the incorrect expiration (MAJOR, MINI, MICRO).

[SCREENSHOT PLACEHOLDER] How to Manage Symbol Rollover — Restoring a Previous Expiration (DeepDOM)  how-to-manage-symbol-rollover-05.png

Select the instrument with the wrong expiration and click Modify .

In the Advanced section, change the expiration month back to the previous contract.

Close the Symbol Management window.

Restart DeepDom without connecting any data streams.

When you reconnect the data feeds after restart, DeepDom will use the restored expiration month for those symbols.

Still Having Trouble?
