

DeepCharts Competition: Join and Connect

Connections & Data Feeds / Setup | beginner | 10 min to complete | DeepCharts Help Center | August 24, 2026

By the end you will have joined a DeepCharts competition and be trading on your contest account with live charts. DeepCharts runs trading competitions periodically; contest accounts run on the **V-Sim** feed source, which is **execution only** — it places your contest trades but carries no market data. That is why you connect two things at once: the contest account for trades, and your own data feed for charts.

Because V-Sim executes trades against real-time market conditions, the free 15-minute delayed feed is not supported for competitions — you need a live Rithmic or dxFeed connection.

Before you start

- An active DeepCharts platform license — [How to Install DeepCharts and Activate Your License](#)
- A live data feed (Rithmic or dxFeed) connected and working — [How to Connect a Data Feed \(Feed Settings\)](#) (the delayed feed in [Use the Free 15-Minute Delayed Data Feed](#) does not qualify)
- A DeepCharts website account to register for the contest

Steps

1. Go to `my.deepcharts.com` and log in to your dashboard.
2. Select **Contest** in the sidebar.

[SCREENSHOT PLACEHOLDER] DeepCharts dashboard with the Contest entry highlighted in the sidebar and an active competition card visible `dc-en-competition-connect-01.png`

3. Find the active competition and click **Join Competition**. You can review the competition rules first via the rules link on the same page.
4. Confirm the prompt, then refresh the browser page.
5. Click **See Credentials**. Note the four values shown: **Username**, **Password**, **Feed Source** (V-Sim) and your competition **Account ID**.

[SCREENSHOT PLACEHOLDER] Contest page after joining, showing the See Credentials button and the credentials panel with username, password, feed source V-Sim and account ID visible (values redacted) `dc-en-competition-connect-02.png`

Note: Credentials appear only once the competition has started. If you registered but see no credentials yet, wait for the start date.

6. In DeepCharts, click **Select Connection** → **Feed Settings**, then click **Add Connection**.
7. Fill in the form:
 - **Name** — any label, for example "Contest".
 - **Feed Source** — select **V-Sim**. This is the critical field; V-Sim sits in the same dropdown as Rithmic and dxFeed.
 - **Username** and **Password** — from the credentials panel in step 5.

[SCREENSHOT PLACEHOLDER] Feed Settings dialog with Feed Source set to V-Sim and the contest username entered `dc-en-competition-connect-03.png`

8. Click **Save** and close the Feed Settings window.
9. In **Select Connection**, connect the contest feed — and make sure your data feed is **also** connected. Both must show green dots at the same time; you can hold multiple connections simultaneously (see [Manage and Switch Between Feed Connections](#)).

[SCREENSHOT PLACEHOLDER] Select Connection dropdown with both the V-Sim contest connection and a live data feed connection showing green dots `dc-en-competition-connect-04.png`

10. Open **Options** → **Symbol Manage** and confirm every exchange is routed to your **data feed, not the V-Sim contest account**. If Symbol Manage points at V-Sim, charts show no data because the contest account carries none. Try the interactive mock below — click the chain-link icon on a row to cycle its mapped feed. See Symbol Manage: Subscribe Exchanges and Map Your Feed.

[WIDGET: symbol-manage-mock]

11. Open a price chart. In the **Trading Panel** (right side of the chart), set the **Broker** field to **V-Sim** and choose your competition account from the dropdown. The starting balance displays \$50,000. Explore the panel in the interactive mock below — hover any button to see what it does, and click the SIM position to watch live P/L:

If you want to reset your account

From the Contest page on the dashboard, click **Reset Account** and confirm. Your balance returns to \$50,000. You are allowed **one reset**, and only within the **first week** of the competition — after that the option is gone, so use it deliberately.

If no competition is open

The Contest page shows a **Join Competition** button only while registrations are open. If nothing is listed, check back — competitions run periodically.

Verify it worked

- Both the V-Sim contest connection and your data feed show green dots.
- Charts update live from your data feed.
- The Trading Panel shows the V-Sim broker, your competition account and the \$50,000 balance.

Competition rules

Rules for each competition are published on the Contest page — review them before trading. Recent competitions used these rules:

Rule	Value
Account type	Simulated demo only (no real money)
Ranking eligibility	Minimum 3 active trading days
Daily loss limit	3% of account balance
Daily profit limit	10% of account balance
Maximum position	5 mini contracts at once
Overnight positions	Prohibited — auto-closed at market close
Resets	1 reset, first week only

An active platform license and a live data feed are required throughout the competition. Prize details for each competition are listed on the Contest page.

If something went wrong

- **Charts show no data** — Symbol Manage is pointing at the V-Sim account instead of your data feed, or the data feed is not connected. Re-route in Symbol Manage: Subscribe Exchanges and Map Your Feed and check both dots are green.

- **No See Credentials button** — the competition has not started yet, or you registered without completing the join confirmation. Check the Contest page shows you as joined.
- **Contest connection stays red** — re-copy the username and password exactly from the credentials panel; see Fix: Connection Failed — Check Username and Password.
- Anything else — see How to Get Help (Chat, Diagnostic Report, Support).
